   (a) Assume the Parent PID is 1000 and the Child PID is 1001. What is the output of the program above?

   (b) Name all four (4) semaphore!

   (c) What is the purpose of line 68?

   (d) What is the purpose of line 71?

   (e) What is the purpose of line 77?

   (f) What is the purpose of line 84?

   (g) How many Critical Section(s) is/are there in the program above? Where/which lines are the Critical Section(s)?

   (h) Explain briefly the purpose of function `fflush(NULL)` in line 50!

   (i) What is the purpose of lines 98 - 101?
